SUMMARY

Aspiring Software Engineer with hands-on experience in MERN stack development and AI integration, focused on building scalable web applications and intelligent features. Strong in problem-solving, clean coding practices, and delivering real-world solutions using modern technologies.

EDUCATION

Bachelor of Technology in Computer Science and Engineering

United Institute of Technology

2023 – Present

Prayagraj, India

Intermediate

New RSJ Public School

2023

Prayagraj, India

- Percentage: 61.2%

High School

New RSJ Public School

2021

Prayagraj, India

- Percentage: 69.5%

PROFESSIONAL EXPERIENCE

Frontend Developer Intern

Rretoriq Communications Pvt. Ltd.

01/2026 – 03/2026

Prayagraj, India

- Developed responsive UI components using React and Tailwind CSS, improving user experience across devices.
- Built and integrated a dynamic pricing page with Node.js APIs.
- Collaborated with backend team to ensure seamless API integration and performance optimization.

Summer Training on Full Stack Web Development

IEEE

09/2025

Prayagraj, India

Built an Uber-clone ride booking web app

Real-time tracking and booking functionality implemented.

Summer Training on Core Java and Collections Framework

Developed a Bank Management System using Core Java, OOP, and SQL for data persistence.

08/2024

Prayagraj, India

SKILLS

Programming Languages: Java | Python | HTML | CSS | JavaScript | SQL

Frameworks and Libraries: React | Node.js | Flask

Core Subjects: Data Structures and Algorithms | OOP | DBMS | Operating System | Computer Networks

Database: MySQL | MongoDB

Tools: VS Code | GitHub

PROJECTS

AI Based Resume Analyzer and Interview Simulator

Currently Working

- Tech Stack:** React, Python, Flask, MySQL, NLP, Transformers
- Building an AI-powered platform that analyzes resumes and generates job-matched interview questions.
- Implemented NLP pipelines to extract and evaluate candidate skills.
- Designed scalable backend services for real-time processing.

VocalBill

AI Based Voice Enabled Smart Billing System

- Tech Stack:** React, Vite, Tailwind CSS, Axios, Web Speech API, Node.js, Express.js, MongoDB.
- Built a voice-controlled billing system using MERN stack with speech-to-action processing and real-time billing.

Docqify AI

Tech Stack: HTML, CSS, JavaScript, Python

Docqify AI is a modern web-based platform for creating professional documents like resumes, cover letters, SOPs, and official drafts with ease. It provides a clean UI, ready-to-use templates, AI-assisted writing, and seamless PDF downloads — all in one place.

React Portfolio Website

- Tech Stack:** React.js, JavaScript (ES6), HTML5, CSS3, Context API, npm, Webpack, Vercel
- Created a responsive React portfolio showcasing projects with reusable components and deployed on Vercel.

CERTIFICATES

Core Java with Collections Framework - United Institute of Technology

IEEE Membership - IEEE
